Revenue Commissioner in Mysore.

To

The Chief Secretary to the Government
of His Highness the Maharaja of Mysore,
Bangalore.

SIR,

I have the honour to forward herewith copy of letter No.A.10-C.373/29-30 dated the 13th August 1929 (together with enclosures) received from the Deputy Commissioner, Kolar District, requesting that Leprosy Regulation may be introduced into the Goribidnur Taluk as there are some persons suffering from this disease in the villages of Mudigere and Hosur and to request that sanction of Government may be kindly obtained to the proposal. It will also be desirable to have a preliminary survey of the disease in this Taluk as was done in the case of Kxxx Malvalli and to post a Sub Assistant Surgeon, who has undergone the course in leprosy treatment so that the spread of this disease may be effectually arrested and eventually to root it out. I am sending a copy of this letter to the Senior Surgeon also.

The Chief Secretary
to the Government of His Highness
the Maharaja of Mysore, Bangalore.

Sir,

With reference to your No. G. 61 Med. dated 3rd July 1930, calling for the final report of the detailed Survey of Leprosy in the Goribidnur Taluk, I have the honour to forward herewith a report in original as received from the Secretary together with Survey Sheets for final orders thereon.

Please note 18/7

The Survey Sheets may kindly be returned when no longer required.

I have the honour to be,

Sir,

Sir,

I have the honour to submit herewith Leprosy Survey sheets recording the results of the Survey conducted in some of the villages of Goribidnur Taluk, Kólar District.

Hosur is about 6½ miles from Goribidnur and has a population of nearly 3000. Seven Leprosy cases were detected in this place of which one was B2. variety is infectious. The rest are practically burnt out cases. In the group of villages consisting of Mudigere, Kenkere Kenchappanahalli, 20 cases of Leprosy were detected out of a total population of nearly 2,300. This group of villages is situated almost near one another on the road

from Goribidnur to Hosur. Of the 18 cases detected at Mudigere, 5 are in the infectious stage being in the B. stage. Six have since left the place for labour elsewhere. The 2 cases detected at Kenkere and Kenchamaranahalli have also left the places for labour elsewhere.

Since Lepers of Mudigere are too poor to take care of themselves and as some of them are in the highly infectious stage, further they not only mix freely with other residents of the place and their houses are also located near one another, it is highly desirable to remove these cases under the Leper Regulation to the Central Asylum at Bangalore. This can be done as soon as the present extension to the Asylum is completed. It is expected that the new building which is nearing completion will be ready for occupation by the end of August.

Most of the houses of Lepers, as they are at present, are of very little value being only small mud huts. These huts may preferably be demolished and the site not allowed to be built upon and new sites be given in a more healthy place for the Non-Leperous population.

All these villages are in a very dirty condition. Their general tidying up is very necessary.

Quarterly inspection of these areas by the Superintendent is very necessary to detect early and new cases so that they may be brought readily under effective treatment.

There is a dispensary at Hosur. The Sub-Assistant Surgeon in charge of the dispensary either present officer or one who may be later on posted to the place may be required to undergo training in Leprosy work in the Central Asylum for a period as per one of the resolutions of the Committee.
